About Me

To pursue a highly rewarding career, I am seeking opportunities to join a challenging and creative environment. I am eager to apply my diverse skill set, exploring and adapting to different fields, unlocking my potential for effective contribution toward achieving goals.

Area of Interest

Web Development

Projects

Title : Hotel Management System

Description : The primary objective of this project is to create a comprehensive web page for a hotel management site. This webpage aims to provide users with essential functionalities, including user authentication through login and signup options, online room booking capabilities, check-in and checkout features, and the ability to modify or cancel bookings.

Title : Plant Disease Detection

Description : The primary objective of this project is to develop an effective plant disease detection system using deep learning techniques. This system aims to accurately identify and diagnose diseases affecting plants.
